Fractal scanning path generation and control system for ... A fractal scanning path which is a FASS (space-filling, self-avoiding, simple and self-similar) curve is proposed for selective laser sintering (SLS). Research on fractal-scanning path for arbitrary boundary ... The fractal curve is proposed as a novel scanning-path used in Layered Manufacturing. Aiming at a limitation that the fractal curve can only fill a square region, a method is developed to realize the trimming of fractal curve in arbitrary boundary layer by means of judging intersection points. International Journal of Machine Tools & Manufacture 43 (2003) 293â€“300 Fractal scanning path generation and control system for selective laser sintering (SLS) J. Yangâ€.

Fractal scanning path generation and control ... - DeepDyve A fractal scanning path which is a FASS (space-filling, self-avoiding, simple and self-similar) curve is proposed for selective laser sintering (SLS). The authorsâ€™ preliminary research has proved that the samples which are produced by SLS along a fractal scanning path possess improved physical performance. The scanning process of fused deposition modeling is realizing the fill of certain region, Therefore, reasonable scanning path planning directly affects the forming efficiency and the precision of the work piece. The method of Hilbert curve fractal scanning path which basing on the characteristics of both partition and parallel scanning is put forward basing on the analysis of the existing.

Automated Torch Path Planning Using Polygon Subdivision ... Automated Torch Path Planning Using Polygon Subdivision for Solid Freeform Fabrication ... curve for scan path generation (Venkataramani, Das, and Beaman 1998; Ganesan and Fadel 1994) and ... Yang et al. (2002) is based on a fractal scanning path for laser sintering. This technique allows space fill- ing, self-avoiding, and self-similar.
